Who Shall Dominate?
Harding's Four Points
Japan's Worry
Lenin's Newest Idea

By Arthur Brisbane

Courtesy, 1920.
Cox says Republican Senators, in opposing the Peace League, are trying to "annex the presidency of the United States to their domination."

May be so, but that would please Americans at least as well as to have Mr. Cox, as advocate of the Peace League, annex the whole United States to the domination of Europe.

As between control of the United States by Republican Senators and domination by a European council, the people of this country would prefer the Republican Senators, however little they may think of Republican Senators generally.

Senator Harding announces his presidential fight on four issues: "Labor, Peace League, farm and tariff." As the fight will be against the Peace League, that makes four American issues. The four issues may not be exactly ideal or complete from every standpoint, but they compare favorably with four such issues, for instance, as "Bessarabia, Mesopotamia, Armenia, Siberia."

To have a candidate for President of the United States apparently taking interest in issues that concern the United States, is a refreshing change from Czechoslovakia and the fourteen little points east of the Atlantic Ocean.

Japan, for a change, has something to worry about more important than the fact that California does not want her land owned by the Japanese or the color of her population changed to yellow.

The Japanese worry about China. They suspect a social revolution there, and well they may suspect it, considering that the Russian Bolsheviks have been very busy on Chinese soil. Naturally, Japan does not like the idea of having, right at her door, hundreds of millions of Chinese, inspired with the Bolshevik spirit and the Bolshevik fighting capacity. If a ferret, preparing to eat a nice fat rabbit, saw the rabbit turning into a wolf, that wouldn't please the ferret, Japan, preparing to swallow nice fat China, is not pleased with the idea of a Bolshevik China that may turn around and swallow Japan.

Russia announces her plan to reduce the regular army of Poland to 50,000 men and at the same time supplying the workmen of Poland, especially those organized in workmen's unions, with all the arms they want. Lenin says that the regular Polish army belongs to "imperialist landlords," whom he does not like or trust. Therefore he will not let them have many soldiers.

But he has confidence that the Polish workmen, if armed, will use their arms to protect themselves, protect peace and prevent war. Therefore he will use to supply the workers of Poland with arms and ammunition while taking away a big army from what he calls "imperialist Polish landlords."

Lenin puts it mildly when he says "this is quite a new idea in international affairs."

It is entirely a new idea to take power from constituted government and give it to the workmen, organized or not organized. Lenin's theory is that government is bad. Those that have seized power are wicked and use it only for themselves. Ordinary workmen are good. If you will give them power they will use it for good.

That is one of many interesting ideas and experiments that come out of Russia. How it will work we shall know later.

Those that now do the ruling and executive thinking for the world will continue to believe until the contrary is demonstrated that it is a little dangerous to take power away from the head and give it to the feet.

A man named Walker has inherited about \$50,000,000 from his friend, Mr. Seale. Mr. Seale married the money when he married the widow of Mr. Honkins, who got his money from Union Pacific railroad.

Mr. Seale's confidence in Mr. Walker seems well placed, judging by the newspaper head lines. Mr. Walker has never taken a vacation. He works all day and until very late on Saturday. He talks very freely, doesn't care for athletics, cards, drinking or any thing else. He isn't married. He doesn't see himself getting married. There are many young Americans who would say "if that is so, you can have your five millions; you have earned them."

The interesting feature of this \$50,000,000 news lies in the revelation of the effect that money has on men. Mr. Seale married \$200,000,000, then devoted himself to making the \$50,000,000. He made \$50,000,000, then died and left the money to a man who presumably will turn the \$50,000,000 that he gets into \$100,000,000.

Possibly by the time he is finished with that undertaking there will be arranged a system of the distribution of wealth through taxes that will turn the \$100,000,000 back to those that created them.

STATE WARMS UP STOCKHOLDERS

THE WEATHER
Boston and vicinity—Clear, probably, tonight. Warm, this afternoon, with light breeze. Tomorrow, light variable winds, becoming fresh from west. High, 65; low, 50. Wind, 30 to 40 m. p. m.; sea, 1 to 2 m. High tide, 1:45 p. m. Low tide, 7:15 a. m. and 7:15 p. m. Temperature at 11 a. m., 54; at 1 p. m., 56; at 3 p. m., 58; at 5 p. m., 59; at 7 p. m., 58; at 9 p. m., 57; at 11 p. m., 56; at 1 a. m., 55; at 3 a. m., 54; at 5 a. m., 53; at 7 a. m., 52; at 9 a. m., 51; him by the Federal and State authorities. The lawyers for the accused were reported as confident of raising the sum today and Ponts felt certain that he would change his narrow cell in the East Cambridge Jail for his London home by nightfall.

Attorney-General Bell was reported as ready to accept the offer of Ponts for Ponts' appearance in court on the fifty-three charges of the recent bank drive. They are believed to be in the company vaults, which have been closed with the seal of the Commonwealth.

Ponts is one closely connected with the Ponsi family circle a unique defense will be made in court for the first time. It will be contended that Ponts is a victim of "financial dementia," a form of insanity defense never before raised in criminal courts.

SOUGHT ON BAD CHECK CHARGE

Newton Man Wanted in That City and in Two Maine Counties

Wanted on a charge of passing worthless checks on his friends, Raymond M. Williams, twenty-three years old, formerly of No. 50 Jerome avenue, West Newton, is sought by the police of that city. It is alleged that the checks are all for small amounts.

The police authorities in Knox and Lincoln counties, Maine, also want Williams on a similar charge. The alleged bad checks in Maine aggregating \$100.

HONEST BURGLAR IS AWAKENED BY POLICE

Herbert W. Tolson of No. 113 Glenwood road, Roserville, received the shock of his life when three policemen, armed with clubs, entered his home and pointed a club at him. He slept. Mrs. C. B. Tolson of No. 425 Broadway, West Hill, had told the police that Tolson, who is for brother-in-law was away on a vacation with his family. She saw a light burning in the house and returned, but no one answered. She thought burglars were at work.

FOUR SPEEDERS FINED \$50 AT FRAMMINGHAM

Frammingham, Aug. 16.—Four motorists, charged with reckless driving, were each fined \$50 by Judge Adams in the District Court here today. The offenders, arrested Saturday night and Sunday, were Armand Valeri, Luther Trapp, August Zingst, all of Frammingham, and Emile Lachette of Whittemore.

America's Biggest Ballet Training for "Aida"

Mme. Marie Paporello and a group of dancers she has in rehearsal for the coming Plymouth Centenary performance of Verdi's great opera.

The largest operatic ballet in America is rehearsing three nights a week in Boston for the centennial performance of "Aida." Under the direction of Marie Paporello, who was the prima ballerina of the old Boston Opera Company, no less than seventy Boston girls are hard at work. The ballet of the Metropolitan Opera House of New York numbers only thirty-six. The Chicago Opera ballet numbers twenty-four. The old Boston Opera had twenty-four dancers.

The Diaghilev Russian ballet in Boston for the centennial performance of "Aida" has 100 members, and the "Aida" ballet will equal that when professional dancers are added. Mme. Paporello is familiar with all the Italian traditions of dancing and she has agreed to duplicate on a big scale the magnificent ballets of the old Boston Opera. The centennial performance of "Aida" will occur at the Plymouth Field on Wednesday, September 1, for one night only.

MANY HURT IN CAR PANIC

Revere Beach Electric Catches Fire When Crowded With Passengers

Several persons were burned and injured and scores of others pummeled and roughly treated during a near panic on an electric car on Revere Beach-East Boston tunnel track which caught fire near the Orient Heights station.

The known injured are:
Mrs. Grace McLanahan of No. 130 Franklin street, Boston, severe burns about the hands and left forearm.
Miss W. Taylor of Preston street, Dorchester, burned.
Andrew Norander of Highland avenue, Somerville, cut on left hand.
Arthur Hader of No. 4 Dudley street, Gloucester, lacerations of the face.
Miss Ethel Coffey of No. 25 Curtis street, Boston, burned about the legs when her clothing caught fire.
Thomas F. O'Brien of No. 181 Erie street, Cambridge, burned by the back.

All of the injured were treated at the East Boston Relief station. Women screamed, children became hysterical, and men passengers fought their way to the center door when the fire was discovered. Many of the passengers, unable to reach the door through the crowd, effected their escape by breaking the windows and jumping to the street.

The car was in charge of Robert Emmet McNamee, and Lester Butler, conductor.

MRS. GLENDOWER EVANS TALKS ON THE COMMON
Mrs. Elizabeth Glendower Evans of Brookline, addressing a Socialist meeting on Boston Common, declared it is time for the people to demand present government from office. She said the working class must gain political and industrial power and institute a co-operative commonwealth. She denounced the imperialism of Eugene V. Debs, Socialist nominee for President, as "imperialism," and asserted that the empire might be repaid.

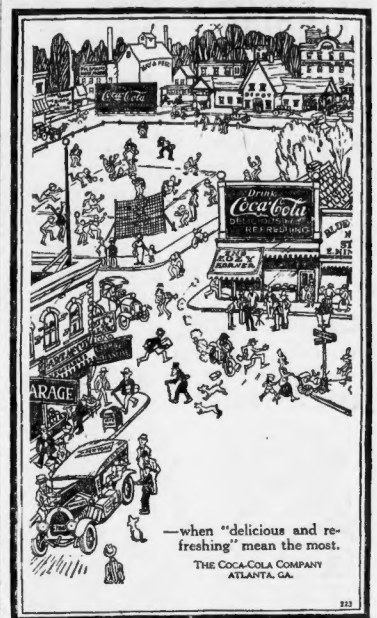

RESCUE DROWNING MAN AT NAHANT
An unidentified man was rescued from drowning at Nahant by Ernest E. Parke, a life guard, who saw him disappear beneath the surface. Dr. Thomas W. Lovett and Captain William A. Anderson of the State Bath House, succeeded in bringing the man to consciousness. They failed to secure his name.

SPECTATOR OF BALL GAME HIT WITH BAT

A baseball bat, slipping from the hands of a player during the progress of a game on Town Field, Fiske corner, Dorchester, hurled over the fence and struck a spectator. The man, thought to have committed suicide by jumping overboard from his bath-tub window, which was flush with the side of the ship, on July 26. He had been dependent and was under the surveillance of friends, but eluded them. Howard was general manager of the American Express Company in South America and was thirty-seven years of age.

BUSINESS MAN LOST OVER STEAMER SIDE

New York, Aug. 16.—Adam B. Howard, said to have been one of the best known North American in South America, was missing when the steamer line ship *Admiral Walker* was thought to have committed suicide by jumping overboard from his bath-tub window, which was flush with the side of the ship, on July 26. He had been dependent and was under the surveillance of friends, but eluded them. Howard was general manager of the American Express Company in South America and was thirty-seven years of age.

Middy Blouses & Smocks

For Women and For Girls' School Wear at a fraction of regular value

1.35

A wonderful lot of these handy summer garments at a wonderfully low price. They're just in time for the school girls, also ideal for the beach and country. Many find them useful and comfortable for house wear.

The midy blouses are all white and white with colored collars and cuffs.

The smocks are in rose, copen, peach, white, flesh, maize, and many are handsomely embroidered on pockets and collars in fancy designs.

Some excellent values in our August Fair Sale now in progress.

Many other equally good values in our Waist Dept.

Jordan Marsh Company—Our Great Basement Store

3 AUTOS CRASH; BLOCK TRAFFIC IN STONEHAM

Automobile traffic on Main street, Stoneham, just about the Plymouth Field, was held up for more than an hour when two automobiles crashed together in a head-on collision, with force enough to drive one of them backward into a third machine. Between seventy and eighty cars were held up in the jam which followed.

An insurance owned and operated by (Quintino Antonio, No. 1 Lynde street, Everett, going toward Lawrence, struck a touring car owned and operated by Fred H. Landry, No. 355 Water street, Lawrence, going in the opposite direction, and drove the latter car backward into a truck owned by the Fitzgerald & Quinn Company, Lawrence, and operated by Peter Quinn, No. 144 Franklin, Chambers, Lawrence. Lavette Antonio, six-ton of the owner of the Insurance, received minor cuts about the face from the glass of the truck. All three machines were badly damaged.

The witnesses were Dr. Joseph L. McLaughlin, prison physician; Dr. George H. McGrath, medical examiner; Surgeon-General Colonel Frank F. Williams; Warren Elmer E. Statelick, Deputy Mayor; Hendry, the Rev. Fr. Murphy, Sheriff John R. Fairbank of Middlesex County, and a prison representative.

For eight seconds, 2000 volts at twelve and one-half amperes surged through his body as the first shock was applied. The final shock was of 2000 volts and six seconds after the first shock had been turned on and the body surged forward in the straps the current was turned off and the official examination by witnesses and physician made.

For the greater part of his last day on earth, the prisoner was in spiritual adviser the Rev. Father De Agostino. He bade his wife and sister goodbye the latter part of last week.

Deputy Mayor William Hendry notified Paul that his execution was to take place. The Rev. Fr. M. J. Murphy, prison chaplain, accompanied the condemned man to the execution chamber.

FEEL DIES IN ELECTRIC CHAIR

Condemned Man Pays Penalty for Murder With Smile on His Lips

Francis Paul, aged thirty-two, of Billerica, convicted slayer of Paul Soule, paid the penalty for the crime in the death chair at the State prison in Charlestown early today.

The accused man walked without faltering step to his death. He smiled as he entered the death chamber and as he was being strapped in the chair. He made no written statement proclaiming his complicity in the crime.

The current used for Paul's electrocution was the heaviest ever applied to a condemned man in the Charlestown prison. His muscular build and power of resistance necessitated the high voltage.

For eight seconds, 2000 volts at twelve and one-half amperes surged through his body as the first shock was applied. The final shock was of 2000 volts and six seconds after the first shock had been turned on and the body surged forward in the straps the current was turned off and the official examination by witnesses and physician made.

WOMAN KILLED IN AUTO UPSET

Five Other Holliston Residents Narrowly Escape Death in Dedham

As the result of the overturning of their automobile on Common street, Dedham, Mrs. John H. Giggles of Chestnut street, Holliston, was killed and her husband, two children and their grandparents, Mr. and Mrs. Cyrus H. Goodrich of Church street, Holliston, narrowly escaped death.

The injured were taken to the General Hospital in Dedham. Mrs. Giggles, 57, died on the way. From a fractured skull and internal injuries. The machine was prevented from pitching over an embankment by hitting a tree.

MILL REOPENING
IS UNCERTAIN

Wood's Statement as to Labor Day Not Consoling to 15,000 Idle in Lawrence

Lawrence, Aug. 15.—The news that the mills will not open until Labor Day, given out by William M. Wood in an informal conversation with newspaper men here, has given rise to the belief that it will be long after Labor Day before the 15,000 now idle will be at their work again.

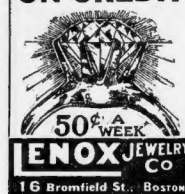

Mr. Wood predicts cheaper clothing but recalled to the minds of the reporters the fact that he was not engaged in the manufacture of clothing.

The American Woolen Company, according to Mr. Wood, will produce their largest line of samples when activities resume in the local mills.

Paris Fashions
In False Teeth

Paris, June 15.—We may safely predict for the coming season that artificial teeth will become the fashion. In place of the usual dental plate, the new fashions are made of a material called "Dentalite" which is a synthetic material made of a plastic resin.

This synthetic adhesive powder gives a pleasant aspect of beauty to the face. It is a new material which is a synthetic material made of a plastic resin.

Summer-Spoiled Skin
Removed by Absorption

As undue summer exposure usually leaves an undesirable surface of tan, redness or freckles, often freckles, the sensible thing to do is to remove such surface. There is a substance which is a skin softener and which actually absorbs an undesirable complexion. The thin layer of surface skin is itself absorbed, and a delicate, refined, and healthy complexion is revealed. In fact, the skin is lighter over the entire face at once, and takes its place in the morning with warm water. If you will get one ounce of mercurial was at the drug store, use it for a week or so, you may expect a marked improvement. Daily use of your complexion will be a marvel of softness, purity and beautiful white skin.

Make Your
Own Complexion
Treatment

If you would have a beautiful complexion, one which will make you exceedingly attractive, just try this recipe. It is a simple, easy to make and get ten cents worth of ordinary oatmeal and from any drug store a bottle of dandruff. Use the oatmeal as directed in every package of dandruff, then it and behold the marvelous change. One application will astonish you. Be sure to read the advertisement soon to appear in this paper, entitled "How to make your Own Complexion Treatment at Home." It gives full details for using the recipe.—Advertisement.

BROOKLINE FIRE
LAID TO 'QUEEN'

Blaze in Walcott Hill Architect's Office Is First to Be Set at Night

Walcott Hill residents saw the hand of the "fire queen" in the night fire in an architect's office in a corner wooden building at Newton and Lagrange streets, Brookline. The fire, which is believed to have been set, did little damage. It was discovered by a resident who telephoned the headquarters. The building is owned by Annie E. Gately of Newton. The fire was the first recorded to the "fire queen," as the person who wrote a letter to the authorities announcing her intention of incendiary destruction signed her name "The Fire Queen." On that day there were two fires in Brookline and one in Brighton. At first in both places, however, a man was seen running away. Previous to the Walcott Hill conflagration the fires were set during the day.

THRILLING DAY FOR
HEROIC MR. COON

Worcester, Aug. 15.—William Coon, manager of the Day State Clothing Store, was held up by a masked burglar. Coon grappled with the bandit, received a blow on the head; chased the armed man down the street; ran to a window of his store and thence to glass roof of the Royal Theatre next door, hoping to fall through the roof into the theatre gallery. Coon has a fractured knee and other injuries.

GOVERNMENT MUST PAY
OUT \$900,000,000 EXTRA

Washington, Aug. 15.—Government expenditures in September will be increased approximately \$900,000,000. Two-thirds of this added cost will represent money to be paid to the railroads. The roads will finish their completion of America's guarantee against loss in the last six months on September 1. It is estimated that the total guarantees will amount to between \$100,000,000 and \$200,000,000.

TWO LAWRENCE BOYS
HELD FOR BREAKS

Lawrence, Aug. 15.—Charles Cross, 15, and Michael Geraci, 14, of No. 35 Orchard street, both aged thirteen, were turned over to the local police by the police of Reading on charges of breaking and entering. The boys confessed to the police that they were responsible for several breaks which have mystified the police inspectors. They were arraigned in Juvenile Court here.

BOY IS DROWNED

AS BOAT UPSETS
Bridgewater, Aug. 15.—Michael Monahan, aged seventeen, of Bay street, Brockton, was drowned in Nipponick Lake when a boat in which he was riding with Henry Cohen of Old Colony street, Brockton, capsized. Cohen made several attempts to rescue his companion but was forced to swim for the shore to save his own life.

MEXICO YIELDS AND
AVERTS CIVIL WAR

Veracruz, Aug. 15.—Civil War in Lower California has been averted by a provisional agreement between the Mexican government and the revolutionary administration of General Carranza, governor of the district, according to a report from Mexico City today. The government is said to have made concessions and promised reforms.

ARLINGTON PRINCIPAL
GOING TO CLEVELAND

Carl H. Burr, for the last three years principal of the Arlington High School, has accepted a similar position at Cleveland Heights, O. He will leave Arlington at the end of this month to take up his new duties September 1. Mr. Burr was made principal of the Arlington High School in 1917.

LEGION ATTEMPTS TO
REASSURE RELATIVES

An effort is being made by the American Legion, through newspaper publicity, to locate "missing" soldiers and sailors reported killed or missing but with all details lacking. In order to give definite information to relatives. More than 2,000 letters have been received by the American Legion Weekly seeking information.

Girl Advertised for
Sale Stirs Town

For Sale—Beautiful girl, four years old, blue eyes, auburn hair, excellent health and charming disposition. Legitimate parentage. High cost of living makes sale necessary. Communications should be addressed to—

This advertisement appearing in a local weekly paper aroused much indignation. More than a score of complaints were made to the police.

LIGHTNING HITS TWO
HOUSES AT PLYMOUTH

Plymouth, Aug. 15.—The home of William Clark at No. 35 Mt. Pleasant street, and one of the cottages on the estate of Frank Hawthorne, located near the Hotel Plymouth, were struck by lightning during an electrical storm which settled over this section of the South shore.

Says Stranger Hit Him

(Hampden) Battle of Warwick street was taken to the City Hospital suffering from a scalp wound which he said he sustained at the hands of a white delivering ice.

TEN-FOOT SHARK DRAWN
TO LAND OFF NAHANT

Life guards and bathers at Nahant captured a man-eating shark, ten feet long, by fastening an anchor back into the gills and towing it to Fishing pier, where it was bled and skinned. The shark evidently had been injured in a fight or had been a new specimen, as it swam with difficulty.

To the Man or Woman who owns any Small Car

At one time or another in your experience, you have no doubt felt the influences that are at work, setting the small car owner apart from other motorists.

The time that you felt it most, perhaps, was when it came to a question of tires for your car.

What every tire dealer hasn't yet found out is that you can't judge a motorist's intelligence by the length of his car's wheel base.

Some of the most critical and experienced motorists in the country are found among the owners of small cars.

Men and women who could afford to own any type of car made, but who were led to the small car for logical reasons.

These are the men and women whom the indifferent type of tire dealer has left out of his calculations.

Intent as he is on looking merely at the cars that drive up to his store, instead of at the men and women who own them.

The United States Rubber Company has never assumed that the best was too good for the owner of any small car—whether Ford, Dort, Chevrolet, Maxwell or any other.

It has never built a high grade of tire for the large car and then cheapened it for the small car.

All of its unlimited facilities—greater and more widespread than those of any other rubber manufacturer—have been devoted from the beginning to building tires of standard and uniform quality.

The same quality in the 30 x 3 1/2 inch size as in the largest size tire it builds.

And nothing less.

U. S. 30 x 3 1/2 inch tires come in four treads—Nobby, Chain, Usco and Plain—a tread for every road.

They are built by experienced workmen in a factory devoted exclusively to the manufacture of small size clincher tires.

A factory which has produced more tires every year for the last three years—and still is unable to produce them fast enough.

The good tire dealer—the man who treats all car owners alike—never even suggests that you be satisfied with anything less than U. S. Tire quality.

He encourages and aids his customers in their search for the best.

Until you have met him, you will never know what it is to get the utmost economy out of your car.

Stocks Were Weak in New York at Noon; Call Money 7 Per Cent.; Exchange Opens Easier

PRICES MIXED IN BOSTON

Local Market is Dull and Narrow. Down from the Forenoon.

—Curb is Heavy

The Boston market was irregular at the opening and during the forenoon, but it was dull as the price range was narrow. Copper began sold at 15.10, while prices for 2020 to date and others as a class ran dull. Mr. May's latest record for the United Fruit Company, which was 1.15, was lower than the previous record of 1.16. Another decline in the price of the stock was noted. The market was dull and narrow, and the price range was narrow. The market was dull and narrow, and the price range was narrow.

Boston Stocks

Prices on the Boston Stock Exchange from the opening until 11:15 a.m. had the following range:

Stocks	Open	High	Low	Latest
Am. Gas	86	86	86	86
Am. Ice	114	114	114	114
Am. Oil	114	114	114	114

REDISTRIBUTION GAIN BY UNITED STATES

The United States has made very great gains, says the National City Bank, as a redistributor of foreign merchandise since the beginning of the war, and the opening of the Panama Canal.

Just how much these two accidental factors affected the United States as a redistributor of foreign merchandise is not at all clear. It is at least a fact that the value of foreign merchandise re-exported from the United States advanced from \$35,000,000 in the fiscal year 1915, to \$100,000,000 in 1917, to \$150,000,000 in 1918, and \$181,000,000 in 1919. This increase in re-exportation is due to the fact that the United States has been able to supply the world with goods at a price which is lower than the price of goods produced in other countries. This is due to the fact that the United States has been able to supply the world with goods at a price which is lower than the price of goods produced in other countries.

Wool Shipments and Receipts

Wool shipments from Boston from January 1 to August 23 inclusive, were 215,000 pounds, against 207,000 pounds for the corresponding period last year.

REPUTATION MEANS STRENGTH

Reputation is a bank's most precious asset. This bank recently celebrated its quarter-century mark in business, and during that time it has zealously guarded and built up constantly its reputation for integrity and strength backed by resources of TWENTY MILLION DOLLARS.

Wildcat statements, promises of larger returns never had a place in the publicity of this institution. We have banked rather on the element of safety in connection with our depositors' money than to lure them with promises of profit that no banking institution conducted on safe lines can afford to give.

Frenzied finance and false profits invariably spell disaster when the day of reckoning comes.

Get a safe return with splendid protection in this bank where a savings account is savings insurance.

UNITED STATES TRUST CO.

30 COURT STREET, BOSTON

MEMBER FEDERAL RESERVE SYSTEM

GET RICH QUICK SCHEMES

The firm or individual promising a large return on money invested, knowing that such promises are impossible of accomplishment, is wrong at heart and should be treated as a criminal.

Any firm offering a speculation and representing it as such, appealing to the speculative instinct which is inherent in all of us. One should speculate with only a small percentage of his available capital, as it is the nature of the thing that a large return is promised the chances to lose are equally as great.

We believe that the depreciation in all European currencies offers an opportunity for speculation without equal.

We have prepared a special booklet on the subject, which will be distributed free of charge, while they last. WRITE OR CALL FOR IT.

Your Best Friend

It Is the Money in Your Pocket

Hard as it seems, there's a good deal of truth in the saying that the best friend in the world is money in your pocket. Money in your pocket is the one thing that is as faithful as a dog.

It asks no questions, demands no references, never inquires into your moral character, does not care whether you are a deacon or a porch climber, never hems and haws and looks the other way; but when you want anything it goes and gets it for you, whether it's a hymn book or a sack of tobacco; when you're hungry it feeds you, when you're cold it makes the storekeeper hand you down his best suit of clothes, when you're thirsty it causes your fellow-men who own drinkables to come running, when you're tired it furnishes you a hair mattress and clean sheets, when you want to travel it tucks you in a comfortable sleeper, when you want to be amused it provides you with an aisle seat in the theatre, and when you're dead it brings out the brethren of the order to march behind your hearse and set up at the head of your grave a stone carved with a few graceful, mendacious compliments calculated to make your folks feel good.

Hence put money in your pocket. Guard against yourself! If you are making \$40 a week, put away \$5 of it, whether you can or not. Don't say it's impossible. Do it anyway. Shut your eyes and make yourself think that you don't own that \$5. If you are earning \$3,000 a year, save \$500 of it.

For, as sure as you live, when the time comes that the bottom drops out of things and you begin to go around from good fellow to good fellow, trying to cash in a little of the good fellowship that you've spent so freely, you will obtain nothing more than a large goose feeling in your inward and will realize that for the man with no money in his pocket this is a damp and unpleasant vale of tears.

Put money in your pocket!

Oh, Subtle Government

Copyright, 1920, Star Company.

The President's message sent to Italy, through Colby, and intended for Lenin, declares that the United States will never recognize Bolshevism or the present Russian Government, but nevertheless this country has great affection for the dear people of Russia. This, the Washington dispatches tell you, is a very subtle message "intended to drive a wedge between the people and Lenin."

Judging by the way Russia has been fighting, the people and Lenin seem to be pretty close together. In any case, when a nation is at war, as Russia is at war, and especially when it is victorious, as Russia is, the best possible way to drive Lenin and the Russian people more closely together is to write just such a message as this country sent to Italy.

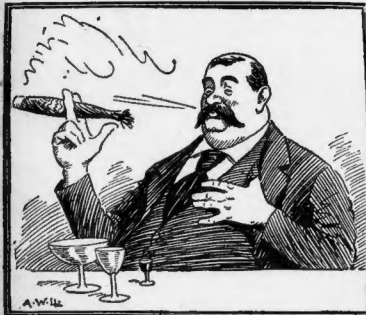

Lenin is able truthfully to say to the Russians: "I have beaten your enemies. You were laughed at under the Czar. Under me the whole world fears you. My cavalry is now in the suburbs of Warsaw. I have only victories to report."

Time enough to begin driving subtle wedges when Lenin and Trotsky begin to lose battles.

Humor and the Working Man

A Picture From London Punch

Copyright, 1920, Star Company.

THIS IS PUNCH'S IDEA OF A WORKMAN ENJOYING HIMSELF

The House of Commons was discussing various matters, taxation, etc., when Jack Jones, a Labor member, asked: "Who has a better right to a good dinner and a good cigar than the working man?"

This strikes Punch as extremely funny, and the picture that you see expresses the Punch idea of the working man, at his good dinner and his good cigar.

This, of course, is NOT the picture of a working man or labor leader in England. In England labor leaders are intelligent workers, put in Parliament by working men and representing working men, not picked by corporations to persuade working men to do what the corporations want.

The picture reproduced here from Punch shows the ordinary English alderman at the end of a dinner including turtle soup, two kinds of white bait, turbot, pheasant and a few other things.

To suggest that the working man should aspire to such grandeur as is illustrated in this picture strikes Punch as extremely humorous.

A real working man would want neither the dinner nor the shape, double chin, etc., suggested in the picture.

In England and elsewhere workmen are making, not London Punch, but the British Government and other governments realize that it is time for the working man to have a reasonable share of the things he produces, including a good dinner and even a cigar to smoke if he happens to want it.

Fly Time

Copyright, 1920, Star Company.

This is the fly catching season.

Prudent housewives set out their sheets of sticky flypaper to snare the winged little disease carriers that are the pest and menace of the Summer season.

A house fly is a foolish thing. It will hover over a patch of paper on which thousands of its fellows are struggling in the throes of death, and calmly permit its own feet to become mixed in the mess.

It sees what is going on, but it does not take warning. Yet the house fly is no more foolish than the silly human fly who

flutters into the lure of something for nothing, as Mr. Winsor McCay shows you in this powerful cartoon.

The promoter spreads his paper smeared with the molasses of impossible promise, get-rich-quick schemes of any kind, and in flutters the fly.

Years of constant warning, and of seeing others with their financial feet hopelessly entangled, seem to make no difference. "Something for nothing" is a sweet bait to the human fly.

The only difference between the foolish house fly and the rattle-brained human fly is that the latter flourishes in all seasons.

More Truth Than Poetry

The Strong Men's Game

By S. E. KISER

ALL day in the street there's a jumble, The witless bump into the jumble; The haughty frown down at the humble, There's stealth in the pickpocket's eyes. And many a man in a hurry Goes dodging the trucks and the cars, With no inclination to worry Over signals from Venus or Mars. They rush and they push and they shove, As rivers go rolling along. And out of the eddies emerge The fearless, the wise and the strong.

TODAY men are peaceful and quiet Who yesterday rushed with the rest, Being eager to loom in the riot And wanting what others possessed.

Today there are men who no longer Let jealousy fret them at all; They have ceased to combine with the stronger To crowd weaker men to the wall.

They have quill being anxious to take What weaker men wanted to claim; They have ceased to be fools for the sake Of being ahead in the game.

TOMORROW more men will be missing, But who will be likely to care? The crowding, the cheering, the hissing, Will cause men to yield or to dare.

Tomorrow the man who is heedless Of weaker men's pleadings and prayers Will lie in his coffin, as needless As orange peels dropped on the stairs;

But they who are rushing along Refuse to be checked or dismayed— Still the weak hope to win from the strong, And the strong fix the price that is paid.

Letters to the Editor

Music at Nantasket

Editor Boston American:

Hearing much criticism regarding the band concerts furnished by the Metropolitan District Commission at Nantasket Beach, I feel some praise and credit should be given to the band which played concerts in the afternoon and evening of August 11.

The writer who is a "lover of good music" had become interested to hear just what kind of music was being rendered, and attended both concerts. There is no question in my mind that the exceedingly large crowd of people thoroughly enjoyed every number rendered, and, as many claimed, they were the two best concerts of the season.

I learned the band was composed of all overseas veterans, most of them having served with the 26th Division.

CHARLES GORTON.

Unfair Prices Editor Boston American:

Have been reading the discussions regarding "twenty-cent berry pie." I offer another instance, which in my opinion is extortion. The locality is the "Braves Field."

Fell fry and bought a bottle of tonic for which I had to pay fifteen cents. On another occasion I bought one tea cream cone. Fifteen cents for it.

Then on still another occasion I paid 25 cents for one package of cigarettes, sold elsewhere at 20 cents. Do you think those are fair prices? I don't.

LEONARD A. WOODS, Quincy.

EARTH SAID TO HAVE A HEART OF GOLD

By Garrett P. Serviss

"When the earth was formed through gravitation did it attract the heavier metals to the center. If such was the case I have often thought that there must be a great supply of gold in the center of the earth. Am I right?—C. K. F."

I THINK it would be "betting on a sure thing" to wager that you are right. Whether the earth was formed by the cooling down and condensation of a nebulous mass, or by the falling together of dust particles or fragmentary materials the heavier substances would tend to collect in the central part and the lighter ones to form the outside.

We can tell what the average density is at any given depth. Taking the globe in its entirety from surface to center we know, as the result of many accurate calculations based upon measures of the force of gravity, that the mean density is about 5.5 times the density of water. But if we restrict the calculation to the upper, or outer, ten miles of the crust it is found that the density does not exceed about 2.75 times that of water. This is not very much more than the density of aluminum or of quartz.

From this it is evident that the deeper parts of the earth must consist of something very much more dense than the average substances that we find on its surface. On the surface gold is present in almost negligible quantities as compared with iron or even with the other principal metals, but its relative abundance may increase in the deep central parts of the globe, somewhat in the ratio of its density.

But it would be useless to base any theory of the relative abundance of the metals within our reach upon their comparative density, because it is evident that some of them, taking the earth as a whole, exist in much greater quantity than others.

Another significant fact of which, however, had been omitted, is that in the beginning, then it might be found that there was quite a regular relation between the amount of each metal within reach from the surface and its relative density, or weight.

Another significant fact of which, however, had been omitted, is that in the beginning, then it might be found that there was quite a regular relation between the amount of each metal within reach from the surface and its relative density, or weight.

THE SPECTATOR

The Importance of Something Good and Solid to Eat

THERE are certain people who talk big and brave about not caring what they eat.

Some of these persons are doctors. They try to follow the wise man who said: "We cultivate philosophy upon a little oatmeal."

One of the bromides in common use is the saying, "We all eat too much." The practice of the ascetics who subsisted on a few herbs and berries and water is popularly supposed to be the ideal thing for superior people, a sort of commendable but utterly unattainable goal, like entire sanctification. As a matter of fact, it is sheer humbug.

So it is time that somebody arose and said a few things in favor of old-fashioned food. It needs to be borne in upon the mind of a confused world that the best thing for a healthy man or woman when hungry is "somp's to eat." By which I mean not so much proteids and so much nitrogenous substance and so much albuminous and so much acid, but I mean good old bread and crisp butter, and sweet ham and crisp bacon, and juicy steak and potatoes, onions, eggs, cabbage and asparagus.

No Good in Starving.

The human race has just a little more sense than the consulting chemist and analyst of the breakfast food factory. What the human race has gone on masticating and assimilating for a century or so is just about good for you.

I doubt if any real good ever came of starving one's self. There may have been some high thinking produced from a menu of greens and spring water, and some piety of a kind, nurtured by fasting, but one is much more apt to do sane and clear thinking on ham and eggs and to develop an agreeable type of boldness on breakfast and gravy.

Americans Worst Fed

Americans of the ordinary, common class, not the over-rich nor the poor, are the worst fed of any ordinary class of people in the world. In three-fourths of the homes of the United States the cooking is neglected and poor. And the trouble is that we put no value on the kitchen.

Now, I candidly believe more domestic happiness has been wrecked by bad cooking than by good whiskey. God bless the wife and mother that knows how to make—and likes to make—good coffee and fluffy biscuit and glorious custard pie, and can broil a steak and turn an omelet, and keep the tablecloth white and clean, and always has cookies in the pantry for the boys when they come home from school, and prepares the most heavenly lemonade and punch for the girls when they have company, and puts out daddy's favorite pie for him when he comes home bruised and worried from a hard day's tussle with the white boss of the street!

In these days of suffragettes and reformers and grand and keep female doings it may be a little out of style to toast the poor, nighted little woman that is sticking to her job of making her man comfortable and her children happy; but God bless her, just the same!

Colonel House intimates that in Europe the worst is yet to come. Has he no mercy at all for those Versailles peace makers?

To say that "Lansing is out of the Senatorial race" compliments him by assuming that he was ever in it.

If Rumania wonders whether the Sovietized Bear has claws, she might save pain and expense by consulting Warsaw.

Is there any reason why all challengers should not be welcome to try next year for the America's Cup? Certainly a Canadian contestant will be.

If Soviet Russia should now become militaristic, don't forget who forced the bad habit upon her.

Instead of striking against "It is competition," why don't the Bridgeport trolley scrap their antique equipment, substitute buses and get up to date?

If Lloyd George will re-read the history of George III. and the Thirteen Colonies, he will learn why there is no hope for a settlement of the Irish question short of independence.

It was sweet of Porto Rico to cut the price of sugar in canning time.

The man who inherited his politics doesn't even have to think he is thinking.

If private ownership of railroads fails this time it will not be because of any modesty in what it wants to charge.
